

## Sunex

# 2Q24 results overview and conference call highlights

Sunex reported results for the 2Q24, in which it recorded an EBITDA loss of PLN 1.5 m compared to our profit forecast of PLN 3.1 m. The loss is larger than expected, even though sales were 8.2% higher than preliminary data: PLN 53.4 m compared to PLN 49.3 m reported a few weeks earlier. The company also held a conference call with analysts today. Here are the highlights:

- The company sees improvement on the Austrian market. Currently, there
  are more orders by the end of September than in the entire last year. This
  is the result of the launch of new governmental subsidies on the local
  market.
- In July 2024, SUNEX acquired 7.9% of shares in the Austrian installation company SA-Energietechnik. By 2027, the remaining shares are to be purchased in three stages for a total of EUR 1.9 m. The company is a provider of comprehensive services in the field of renewable energy and smart home systems. It offers heat pumps, photovoltaic systems and carports of the latest generation.
- SA-Energietechnik complements Krobath's activities in Austria. The companies operate in various geographical areas of Austria.
- Currently, there is an inflow of new orders compared to last year, but this level is not significant enough to increase current sales. The situation should improve at the turn of Q1 and 2Q25.
- On the German market, a new round of subsidies started in 2Q24. However, they are at a lower level than on the Austrian market.
- The Sunex sales network on the Austrian market is already built after the acquisitions, while on the German market it is still under construction.
- Currently, few new single-family houses are being built on the German and Austrian markets. The cycle of interest rate cuts that has just begun will help reverse this trend, but most likely only until 2026.
- The company records lower margins due to strong competition and higher costs. The influence of cheaper Asian products is very visible.
- By the end of the year, Sunex plans to develop a cost savings program, such as marketing costs, which should help improve margins. This may result in savings of PLN 3-4 million in the next year.
- By the end of the year, Sunex should introduce composite tanks for sale, which are currently starting to be produced.
- There is no chance for a quick market recovery on the Polish market due to the confusion related to the ZuM list and the black PR surrounding the installation of new heat pumps.
- Capacity utilization is currently low. As a result, margins also suffer. Direct sales in Germany and Austria may improve results in the next year.
- For now, there is no visible recovery, which was usually observed in Autumn in previous years. Therefore, it will be difficult to make up for the loss from 1H24 in 2H24. Therefore, a net loss in 2H24 is possible.
- For now, there are no problems with banking covenants.

*Opinion: Negative.* For now there are little prospects to improve the results in the 2H24 due to still demanding macroeconomic environment.

On the order of the Bursa de Valori Bucuresti S.A. ("BVB"), IPOPEMA Securities S.A. creates analytical materials for the following companies: Bittnet Systems S.A. and Impact Developer & Contractor S.A. The BVB has proprietary copyrights to these materials. For the preparation of IPOPEMA Securities S.A. receives remuneration from the BVB.

IPOPEMA Securities S.A. uses a number of valuation methodologies including discounted cash flows models (such as discounted operating earnings or dividend discount model), and earnings and cash-flow based models, which are often related to comparisons with selected peer companies. Cash flow models encapsulate the cash streams forecast to flow to a company, and are widely used in the investment industry. Peer comparisons factor in amongst other factors, differential growth rates, and indicate how expensive one company might appear relative to a chosen comparator. The subjective opinions of the report's author or authors, formed by their knowledge and experience, play a significant role in the valuation. Also included are assumptions on numerous economic variables, particularly interest rates, inflation and exchange rates and varying these assumptions could results in significantly different opinions. The strength of the earnings and cash flow based models is the closer attention to a company on a standalone basis, and tying the valuation to its fundamental value. The weakness of such method is the number of assumptions, which need to be adopted and resulting sensitivity to those assumptions. The peer comparisons methods are less dependent on the analyst's judgment as to the individual parameters, however the problem with this method appears when the peer comparator is over- or undervalued. Moreover, leading multiples (based on the future earnings, book values, operating profit or cash flows) include an analyst's estimate of those values.

This document was not transferred to the company prior to its publication. This document was prepared according to the author's own view, assumptions and knowledge.

Recommendations issued by IPOPEMA Securities S.A. they are valid for a period of 12 months from the date of issue, unless they are updated during this period. IPOPEMA Securities S.A. updates the issued recommendations depending on the market situation and subjective analysts' assessment. In the last 12 months IPOPEMA Securities S.A. has not prepared any recommendation concerning the company.

This document is an investment research within the meaning of Art. 36 par. 1 of the Commission Delegated Regulation (EU) 2017/565.

List of all recommendations regarding any financial instrument or issuer that have been disseminated within the last 12 months by IPOPEMA Securities S.A. is available on the website at <a href="https://www.ipopemasecurities.pl/analizy-i-rekomendacje.p162">https://www.ipopemasecurities.pl/analizy-i-rekomendacje.p162</a>.

The date and the time stated on the front page is the date of the preparation of this document. The price used throughout the recommendation to calculate adequate ratios is the "last" price stated on the front page of this document.

The definitions of terms used in the document include:

NII - Net interest income - interest income minus interest expense.
